**PHILLIPS SAFETY**  
PRODUCTS INC.

Phillips Safety is the industry leader in occupational safety eyewear. In business for over 100 years, you are being served with the dedication and craftsmanship of a family owned company.

Phillips Safety has been producing occupational safety glasses since 1905 and continues to develop and produce the highest quality glasses and lenses today. A leading manufacturer of specialty safety eyewear in the United States, Phillips Safety adheres to strict ANSI Z87-2+ and EN 207 CE standard certifications, holding itself to a highest standard and prides itself on producing glasses with the finest quality materials available.

All safety glasses produced and sold by Phillips Safety meet strict industry standards for military, medical, research laboratories, and a variety of other industries.

With Phillips Safety's dedicated team, you can rest assured knowing that all your prescription safety needs are met.

**CATEGORY INFORMATION**  
LASER POINTER SAFETY GLASSES

Laser pointer safety glasses are specialized eyewear designed to protect the eyes of pilots from potentially harmful laser beams. Originally developed for US Military pilots, these glasses are specifically engineered to filter out and attenuate the wavelengths of light emitted by laser pointers, which can pose a significant safety risk when aimed at aircraft cockpits.

With Phillips Safety's laser pointer safety glasses you can count on superior protection and a comfortable fit, backed by our long-standing commitment to eye safety. Our strike eyewear features a lightweight design that fits comfortably under headsets or helmets. Additionally, we offer laser safety glasses that can be worn over prescription glasses, catering to the needs of those who require prescription eyewear.

**CATEGORY INFORMATION**  
**LASER POINTER SAFETY GLASSES**

Our laser pointer safety glasses feature specially designed polycarbonate lenses that offer distortion-free viewing of instrumentation. These lenses are also highly effective in protecting against all three laser color spectrums: green beam, blue/green beam, and blue/green/red beam. At Phillips Safety, this technology is available to civilian pilots, as well.

Our range of options offers varying visible light transmissions, ranging from 23.3% to 43.0%, depending on the specific laser color spectrums. Each product clearly indicates its corresponding VLT percentage. Moreover, all of our laser pointer safety glasses strictly adhere to ANSI Z136.1 safety standards, ensuring the highest level of eye protection.
