PRODUCT INFORMATION

SURGICAL DROP FRONTAL LEAD APRON LIGHTWEIGHT LEAD

The Lightweight Lead Surgical Drop Frontal Lead Apron is a highly effective and comfortable option for reducing radiation exposure. This apron covers the front of the body from shoulders to thighs, leaving the back open. It features a convenient patch pocket on the front and shoulder pads for added comfort. The cross-shaped back straps prevent slippage during procedures, while Velcro on both sides of the waist ensures a secure fit.

Designed for both men and women, the Surgical Drop Frontal Apron is available in five sizes: S, M, L, XL, and XXL. It is made with a lightweight lead core material and offers two protection options: 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. The core material also meets ASTM F3094-14 testing standards, ensuring reliability and safety. Plus, it is available in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. It is available in a variety of colors, all with black binding.

SPECIFICATION

RIPSTOP

Ripstop is a woven fabric that utilizes a reinforcing technique to enhance its resistance to tearing and ripping.

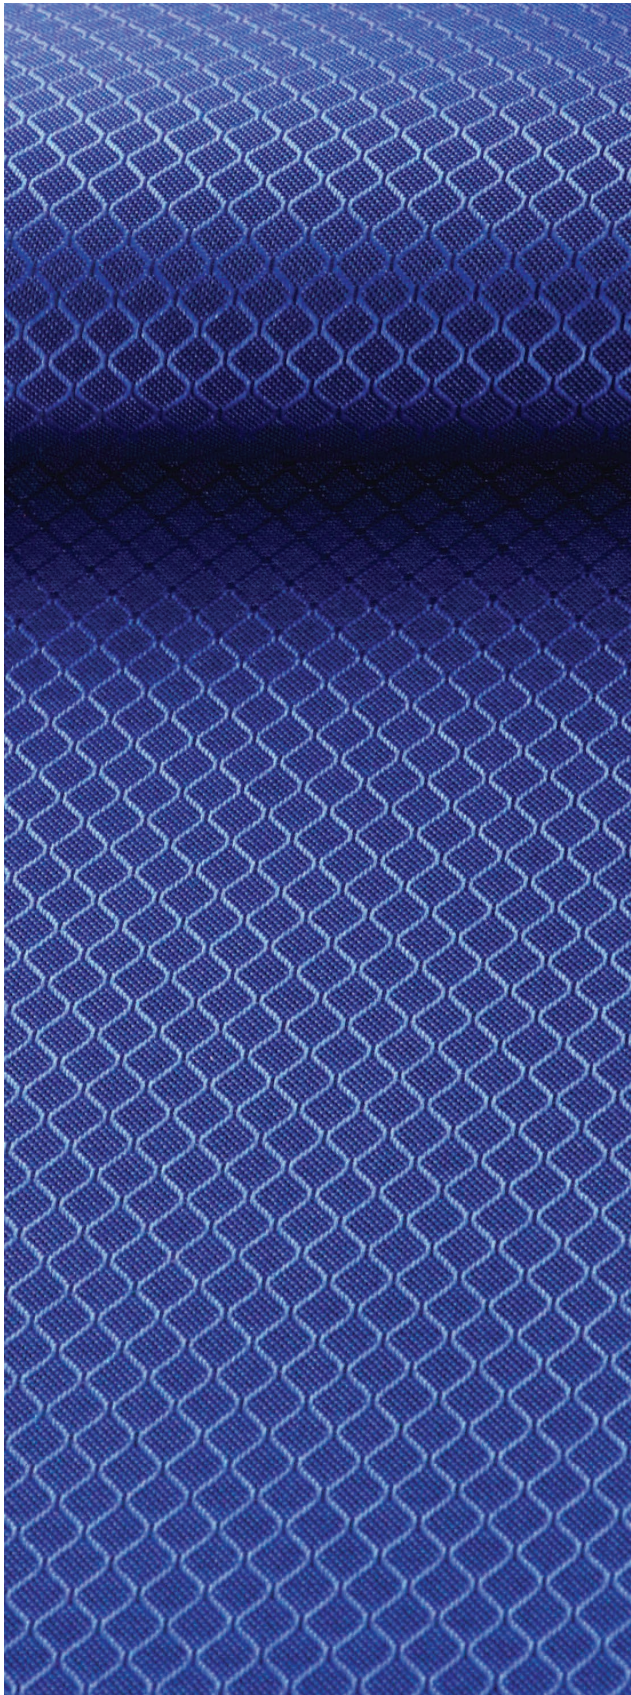

Commonly made from nylon, this lightweight material features interwoven reinforcement threads arranged in a crosshatch pattern, giving it a distinctive diamond-like appearance.

POLYTRON

Polytron is a smooth, soft-touch fabric made in the U.S. Its flexible and comfortable qualities come from the polypropylene it's made of.

This lightweight material is inherently stain-resistant, free of PFC chemicals, and can be cleaned with bleach.
